# What is LaTeX

LaTeX is a document preparation system used for creating professional and well-structured documents.

**Major features:**

- Professional typesetting
- Mathematical equation support
- Automatic numbering
- Easy document organization
- Customizable formatting

# Document Structure

A LaTeX document can be organized using:

- Chapters
- Sections
- Subsections
- Abstract
- Headers and Footers

Packages such as `geometry`, `sectsty`, and `fancyhdr` provide additional formatting features.

# Conclusion

**Thank You!**

LaTeX provides a powerful and flexible way to create professional academic and technical documents.
